RE: Software Engineer

Dear Hiring Manager,

Throughout my career, I have contributed to positive business results through effective organization, prioritization, and critical thinking. The edge cutting Engineering & Technology along with challenging project and welcoming culture at workplace inspired me to apply for this position and I believe my strengths and qualifications are an ideal match to the Software Engineer requirements and will bring immediate value to Engine.

I have worked over 15+ responsive web applications and keen to upgrade myself with day to day learnings. Along with web application development, I have a great exposure to project coordination with client and team, project planning for one year as a SCRUM Master. I have also developed RESTful API, consumed WCF services. I have in-depth. understanding of object-oriented programming. I have worked on complex projects and have successfully met the client's expectations.

I am confident that my experience in software development along with good management skills will help me to complete the assigned task successfully. After reviewing my resume, if you'd like to discuss further how my skills and expertise might benefit Engine, please call me.

Sincerely,
Pooja Upadhyay
